DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 1-42 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are required to be rewritten in accordance with U.S. practice. A method claim is basically a sequence of actively performed steps. Line 5 of claim 1 refers to “successive transformation steps” but the following language is merely functional without the recitation of the steps that are necessary to perform the recited functions. The sequence of steps that are necessary to perform the recited functions are required to be recited. To what disclosed structure does the “ a single set of butterflies”, lines 7-8 correspond? Claim 2 contains deficiencies similar to claim 1. The functional language in the dependent claims fails to be supported by the recitation of the steps that are necessary to perform the recited functions and all steps are required to be clearly related to all previously recited steps and the sequence thereof.

Allowable Subject Matter

2. Claims 1-42 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.
